Nhlanhla Muthwa

Software Developer Plus

About Me

I am a young energetic, motivated and technical minded Software Developer who loves to use pedagogical thinking skills in solving complex problems. I have attitude of adding the value to world through software development and advanced technology.

I am a team player and I believe in self-organising team because this type of a team always reach goals in short period of time. I love to be expose to problems that are more complex and time management is my daily bread and I am eager to learn more advanced technologies and also learning from others.
