Nhlanhla Muthwa

Interaction Designer | Software Engineer | Data Analyst | IT Professional

Durban Metropolitan Area

Summary

Highly conscientious and skilled IT professional with a keen eye for detail and a proactive approach to meeting team needs. Possesses the ability to effectively work with raw data and thrive in time-sensitive, target-driven environments. Demonstrated expertise in precise data entry, enabling exceptional levels of accuracy and efficient organization of large datasets to meet tight project deadlines.

An accomplished support specialist with a strong track record of providing reliable information and delivering top-notch communications technology assistance. Proficient in maintaining robust, high-performing systems through vigilant monitoring and implementation of improvements. Known for resolving issues swiftly and accurately by employing focused troubleshooting techniques.

As a knowledgeable member of the IT team, adept at setting up, maintaining, and repairing user stations, while diligently maintaining comprehensive records. Possesses outstanding troubleshooting and critical thinking abilities, consistently demonstrating exemplary problem-solving skills.

Recognized for innovative thinking and success in evaluating software development project requirements, leading to the design of cutting-edge solutions. Dedicated to enhancing performance, I am an individual that brings a strong team-oriented approach and consistently delivers results within stipulated deadlines.

Experience

Department of Health South Africa
Information Technology Engineer
May 2024 - Present (1 year 3 months)
Pietermaritzburg, KwaZulu-Natal, South Africa

Responsible for designing, developing, and maintaining Business Information Systems for the KZN Health Department. Working closely with Business Analysts, I translate business requirements and the BRD into detailed System Requirement Specifications (SRS), ensuring alignment between business needs and technical solutions.

I develop complete web-based systems using C# and the Blazor framework, with JavaScript, CSS, and VB.NET for legacy integration. On the backend, I design and optimize relational databases using Microsoft SQL Server (MS SQL), focusing on data integrity, security, and performance.

I manage the full system architecture—front end, back end, and database—to deliver seamless, scalable applications. I create intuitive user interfaces with Figma to enhance usability. For source control, I use Git and leverage Azure DevOps for project management and CI/CD pipelines, streamlining development and deployment.

In addition to development, I administer systems like ICAS Sys, ICAS EMS, and ITSM, handling user management, profile troubleshooting, and creating custom BMC dashboard reports. I also build interactive Power BI dashboards that transform complex data into actionable insights, supporting informed decision-making across departments.

My combined expertise in requirement engineering, full-stack development, database management, and system administration helps drive digital transformation and improve operational efficiency within the KZN Health Departments.

Microsoft Partner

Microsoft Partner Developer

July 2021 - Present (4 years 1 month)

Developing and deploying applications on the Microsoft Store.

Leveraging Microsoft Partner Network resources for app development, testing, and publishing.

Ensuring compliance with Microsoft Store policies and optimizing applications for performance and user experience.

Utilizing Microsoft technologies such as Azure, .NET, and Visual Studio for software development.

Appen

Independent Contractor

September 2022 - January 2024 (1 year 5 months)

South Africa

Collected, labeled, and annotated data for machine learning models, including images, text, and audio.

Evaluated and rated search engine results and online content to improve relevance and quality.

Transcribed audio files and performed translation services across various languages.

Conducted usability testing of apps and websites, providing feedback on user experience and system functionality.

Worked remotely on a flexible schedule, delivering high-quality results on a project-specific basis.

Ndabase Printing Solutions

Data Capturer

May 2021 - May 2021 (1 month)

Amanzimtoti, KwaZulu-Natal, South Africa

Transferred data from paper formats into database systems to keep digital formats.

Identified errors in data entry and related issues, reporting to supervisors for resolution.

Compared source documents to verify accuracy of data.

SITA SOC (Ltd)

Information Technology Technical Support Technician

May 2019 - June 2020 (1 year 2 months)

Pietermaritzburg, KwaZulu-Natal, South Africa

As an IT Technical Support Technician, I delivered effective and hands-on technical support to users and departments, ensuring the reliability and performance of IT systems across various locations. I played a key role in configuring routers and switches for multiple KZN government departments, establishing secure and stable network connectivity tailored to each department's operational needs. I also resolved connectivity issues, helping departments maintain continuous access to critical services.

In addition to networking duties, I installed and configured essential software such as Microsoft Office and antivirus programs, and maintained an accurate electronic asset register. I used remote access tools and a support ticketing system to diagnose and resolve hardware and software issues promptly.

My responsibilities included setting up and upgrading workstations, performing hardware maintenance, and conducting regular inspections to ensure system reliability. I also managed network setups and Wi-Fi configurations for departmental environments.

Known for my ability to communicate complex technical issues in a simple and professional manner, I provided user support that was both accessible and effective. My combination of strong troubleshooting skills, networking expertise, and user-focused service consistently contributed to the successful delivery of IT solutions throughout the province.

Khabane Majestic Consulting

Software Engineer

April 2018 - August 2018 (5 months)

City of Johannesburg, Gauteng, South Africa

Gained in-depth expertise in various coding languages, including C++, Java and JavaScript.

Learned new skills, testing techniques and troubleshooting best practice

Assisted in program development through planning, designing, creating and testing.

Created HTML templates, JavaScript files and CSS for UI module development.

Attended training to learn software development theory, techniques and coding best practices.

Assisted in all software development project aspects, such as planning, design and building.

Identified software requirements and solutions by developing flowcharts, layouts and documentation.

Coded prototypes of new technologies and features for potential integration into future software.

Helped reduce debugging time by developing test scripts and tools for automated testing.

Tested code for bugs or technical issues, debugging to fix errors and boost performance.

Participated in code reviews to help improve quality of code written by development teams for high quality, reliable and stable software.

Learnt new technologies and systems through extensive research and training to understand software functionality.

Observed employee processes to understand work techniques, practice and applied knowledge acquired in designing improved software.

Fixed and improved existing software through inspections, testing and analysis and implemented fixes by deploying patches to production software

Education

University of South Africa/Universiteit van Suid-Afrika

Bachelor of Science - BS, Computer Science · (January 2021 - November 2023)

CTU Training Solutions

Higher Certificate, Information Technology Systems
Development · (2017 - 2018)

Netcampus SA

National certificate, Information Technology Technical support · (2019 - 2020)

State information Technology Agency

Certificate, Windows 7 · (2019 - 2019)

Esizibeni Svananda Vaswani High School

Matric, Matric · (2013 - 2013)
